

Hello, I'm **acortino.**

Senior Software Engineer

I build backend and real-time systems under production constraints.

Strasbourg, France

hello@acortino.me

PROFILE

I'm a software engineer focused on backend and distributed systems. Most of my work has been around real-time processing, APIs, streaming pipelines, and integrating AI workloads into production systems. I like simplifying systems, reducing operational friction, and iterating through real-world constraints such as latency, reliability, and scale.

SKILLS

CORE

Daily / production

Java • Python • SQL
Spring Boot • Kafka • gRPC
PostgreSQL • REST APIs • WebSocket

FAMILIAR WITH

Used / comfortable

Angular • TypeScript • FastAPI • Django
AWS • Kubernetes • OpenTofu/Terraform • Helm
Auth0/SCIM • Github Actions

EXPERIENCE

Jan. 2026 – Present
Ongoing
Strasbourg, FR

Sr. Software Engineer

Independent Project

Building a medical workflow application around transcription, reporting, and AI-assisted image analysis.

- Built backend services for patient case management, report generation, and resumable workflows.
- Implemented a real-time transcription pipeline using WebSocket, Java, gRPC, and Python/Whisper.
- Integrated external AI services for segmentation and prediction through Python gRPC workers.
- Built deployment infrastructure on AWS/Kubernetes using OpenTofu and Helm.

Spring Boot Angular Python gRPC AWS CI/CD

Feb. 2023 – Jan. 2026
3 years
Palo Alto, CA, USA

Sr. Software Engineer

Uniphore

Worked on real-time AI systems for sales intelligence products.

- Owned a Python service for real-time sentiment analysis integrated into a Kafka/gRPC microservice pipeline.
- Reduced end-to-end latency by 84% by replacing file-based exchange with chunked streaming.
- Reduced memory usage by 70% in a core Java service using streaming buffers.
- Built a SCIM synchronization service between Okta/AD, Auth0, and internal systems.

Spring Boot Python Kafka gRPC SCIM

Aug. 2020 – Feb. 2023
2.6 years
Strasbourg, FR

Software Engineer

Hexagone Behavioral Technology

Worked on multimodal emotion analysis systems processing voice, facial, and text data in real time.

- Built low-latency streaming services for audio sentiment analysis using Kafka and WebSocket.
- Integrated ML models into production services with validation and fallback handling.
- Contributed to deployment and monitoring on OpenShift environments.

Python Django Kafka OpenShift Angular

Last update: May 2026

Mar. 2018 – Jul. 2020 2.3 years Strasbourg, FR	Software Engineer Worked on cross-platform mobile applications for carpooling services. ■ Maintained iOS and Android applications built with Angular and NativeScript. ■ Integrated messaging, geolocation, and payment systems. ■ Built CI/CD pipelines for App Store and Google Play releases. Angular TypeScript NativeScript Mobile	Oxycar
Sep. 2016 – Mar. 2018 1.6 years Belfort, FR	Software Engineer (Co-founder) Built analytics tools around large-scale social media datasets during the 2017 French presidential campaign. ■ Built data ingestion and search services using Node.js and Elasticsearch. ■ Processed and indexed more than 20M tweets. ■ Developed dashboards for real-time exploration and visualization. Node.js AngularJS Elasticsearch	Blueanthill
Sep. 2013 – Sep. 2016 3 years Montbéliard, FR	Software Engineer (Apprentice) Developed internal engineering tools and simulation software for automotive projects. ■ Built automation tools around CATIA workflows. ■ Developed a thermal simulation tool for automotive A/C systems. ■ Contributed to a prototype in-car interface presented at the Geneva Auto Show. C++ Delphi CATIA	Segula Technologies
Mar. 2013 – Jul. 2013 0.4 years Belfort, FR	Web Developer (Intern) Built internal web tools and deployed network access solutions in real-world environments. ■ Developed internal Django web tools. ■ Helped deploy a captive portal system for Les Eurockéennes festival. Python Django	Trinaps

EDUCATION

2013 – 2016 Montbéliard, FR	Engineering Degree Computer Science — Information Systems	Université de Belfort Montbéliard
2012 – 2013 Belfort, FR	Bachelor's Degree (Licence) Web & Mobile Development — System Administration	IUT Belfort Montbéliard
2007 – 2013 Belfort, FR	DUT (BTEC Higher National Diploma) Computer Science	IUT Belfort Montbéliard

OUTSIDE WORK

READING

Emil Cioran • Daniel Quinn • Albert Camus • George Orwell • Chuck Palahniuk • Luke Rhinehart • Noam Chomsky • Chinese classics

INTERESTS

Animal behavior (evolution, biomimicry, edge-cases) • renovation • cooking • small automation tools

LANGUAGES

 French (*Native*) •
  English (*Fluent*)
 Learning:
  Italian (*B2*) •
  Chinese (*Beginner*) •
  Spanish (*Beginner*)
